# **WEATHER OF CONCERN**

## **Weather of Concern**

- The National Weather Service has issued Fire Weather Watches across Northern California beginning 09/23/17 due to lowering humidity values and periods of gusty northeast winds.

## **Active Weather Warnings, Watches and Advisories by County:**

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

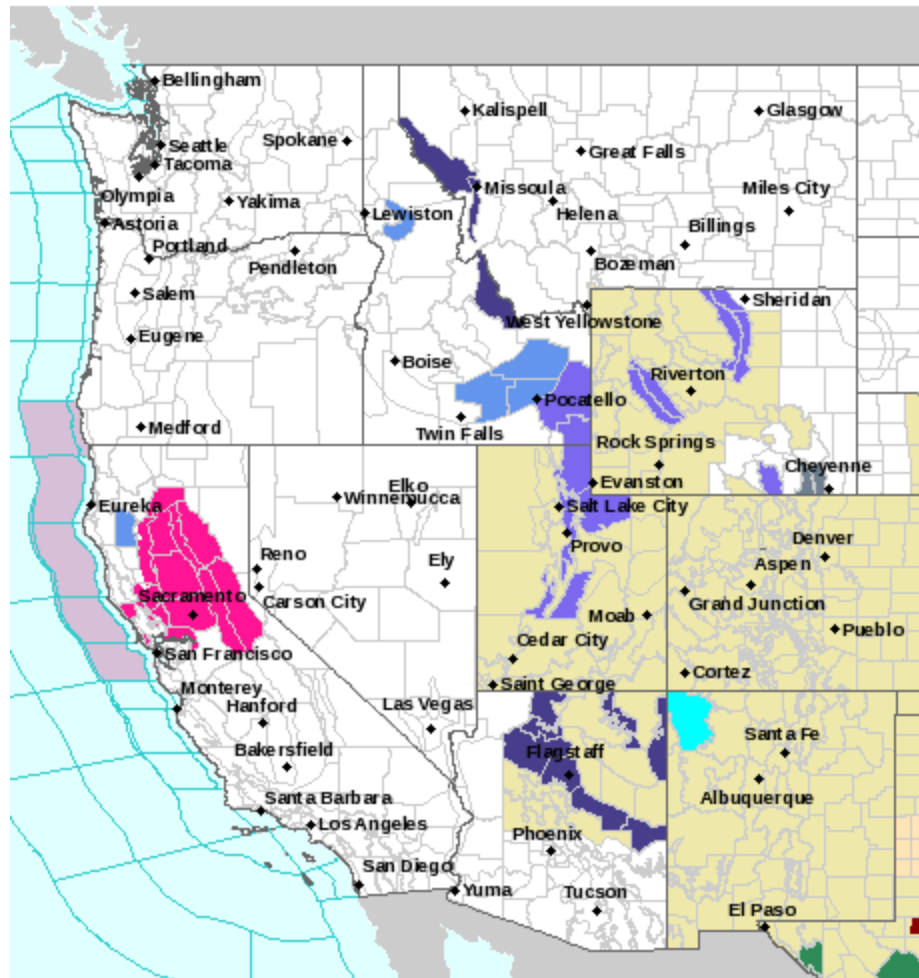

A high pressure ridge centered off the coast will gradually increase pressure over the Pacific NW this weekend. This is a classic weather pattern that generates light to moderately strong, gusty N to NE winds with low daytime RH and poor overnight recovery in the Sacramento Valley/Surrounding Foothills, and portions of the Bay Area and Mid Coast to Mendocino PSA's. That gusty wind/low RH combination is expected to bring "High Risk" for Significant Fire Potential to the Sacramento Valley and Surrounding Foothills Monday into Tuesday and increase Significant Fire Potential in the other PSA's mentioned. Peak wind gusts during this event will be 20-30 mph in and around the Sacramento Valley Sunday through Tuesday and minimum RH will likely range from about 12-20%. Dry, mild weather will remain in place all week in spite of the high pressure weakening and a (dry) low pressure trough expected to approach and pass by late next week.

Temperatures will be warming, but still 8-10 degrees below normal today before warming to around normal values or slightly above early in the week (upper 80's to low 90's warmest inland valleys). Lowest afternoon RH will largely be around 15-20% the latter half of next week. Lighter winds are expected starting Wednesday.

## **SOUTHERN CALIFORNIA**

Well below normal temperatures along with humid conditions will continue today as a deep area of low pressure spins over the Great Basin. Maximum temperatures will be in the mid 50s to mid 60s across the mountains and upper 60s and 70s in the valleys. Minimum humidity will be above 20%, except there will be widespread teens across the deserts. A ridge of high pressure over the Pacific will approach the West Coast bringing a warming trend along with minimum humidity in the teens Sunday through the end of next week. Most coastal and valley locations will warm by around 10 degrees, while most mountain and desert locations warm by around 5 degrees on Sunday. Offshore winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California, mainly in the mornings, Sunday through the end of next week.
